

PROFESSIONAL SUMMARY

Staff Software Engineer with 6+ years of experience leading scalable backend and integration projects in Java and TypeScript, mentoring teams, and using AI-driven tools to accelerate development and delivery.

WORK EXPERIENCE

Wisdom Square Technologies

New York, United States

Software Developer

January 2025 - Present

- **Architected scalable integration frameworks** using Spring Boot, PostgreSQL, and TypeScript, improving API latency by **30%** and applying **SOLID principles** to ensure modular, maintainable system design.
- **Leveraged AI-assisted tools (GitHub Copilot, Cursor)** to automate test generation, documentation, and code refactoring, enhancing development efficiency and code quality across teams.
- **Led code reviews and mentored junior engineers** on system design, testing best practices, and CI/CD optimization, fostering a culture of clean architecture and shared learning.
- Partnered with product, design, and infra stakeholders to build **data-driven dashboards and reusable APIs**, reducing workflow time by **25%** and expanding platform adoption across three business units.
- Enhanced **CI/CD pipelines (GitHub Actions, Docker, Maven)** to standardize deployments and reduce build failures by **40%**, while creating reusable automation templates to scale engineering efficiency.

Reminiscence Jewels Inc

New York, United States

Web Development Engineer

April 2024 - December 2024

- Designed and optimized **ETL workflows and microservices** integrating PostgreSQL and MongoDB, improving data throughput by **20%** and ensuring high reliability for analytics workloads.
- **Built modular backend systems in Java and Python**, automating reporting processes and enhancing data consistency across distributed environments.
- Containerized and deployed services via **Docker and Terraform (Pulumi)**, reducing rollback incidents by **30%** and enabling consistent, scalable rollouts across environments.
- Authored **engineering standards, CI/CD documentation, and onboarding playbooks**, reducing ramp-up time for new engineers by **20%** and improving codebase maintainability.
- Supported **incident resolution and on-call operations**, ensuring business-critical uptime and improving SLA adherence for client-facing systems.

Nsquare International IT Services

Nagpur, India

Software Developer

January 2020 - December 2021

- Developed and deployed **REST APIs** that enabled secure, real-time data integrations with enterprise clients, supporting over **1,000 daily transactions** and ensuring reliable communication across business systems.
 - Optimized complex **SQL queries and backend logic**, cutting data processing time by **40%**, lowering infrastructure costs by **15%**, and improving overall system scalability and reporting efficiency.
 - Contributed to **architecture reviews and design discussions**, strengthening code quality, enabling efficient deployments, and ensuring backend systems were modular, maintainable, and performance-optimized for long-term use.
-

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python, Go (familiar), C++
 - **Data & Analytics:** Pandas, NumPy, SQL, PostgreSQL, MongoDB, ETL Pipelines, Data Ingestion, APIs
 - **Backend & Infrastructure:** Spring Boot, Node.js, FastAPI, Express.js, Docker, Kubernetes, Terraform, AWS, CI/CD (GitHub Actions)
 - **Testing & Monitoring:** JUnit, Jest, Cypress, TDD, Logging, Metrics, Observability (Splunk)
 - **Other:** Documentation, Collaboration, Performance Optimization, System Scalability
-

EDUCATION

PACE UNIVERSITY

New York, United States

Master of Computer Science (STEM)

May 2024

G.H Raisoni College of Engineering

Nagpur, India

Bachelor Of Engineering

May 2021

TECHNICAL PROJECTS

E-commerce Inventory & Analytics Platform

September 2023 - January 2024

- Built and deployed a MERN-stack platform on AWS with CI/CD integration (GitHub Actions + Docker), supporting scalable deployments and real-time analytics.
- Designed a React-based analytics dashboard with MongoDB aggregations, improving inventory visibility by **30%**.
- Implemented secure Node.js/Express APIs with role-based access and encryption to ensure data integrity.
- Automated validation scripts, reducing manual QA effort by **50%**.
